

MANAGER'S ASSISTANT™

Timer PC application Guide

Programming the Timers for MANAGER'S ASSISTANT™ via a laptop

Kit# 970514 Manager's Assistant Timer Programming Kit includes:

801114	BOH adapter
681-6x6-96	ICC 96" data cable
890514-1	MA Timer PC application (MATimer.exe)
896514-1	Manager's Assistant Timer PC Application Guide

>>>> Timers >>>>	
Travel Path	Wash Hands
Clean PHU	Seven
Beef Cook	Eight
Thaw Produ	Nine
Rotate DT	Ten

This application makes it easy to program all 10 Timers in your Manager's Assistant with a click of a button from a Laptop computer. The Timers cannot be programmed from the BOH computer/Kitchen Minder; a Laptop computer is recommended.

>>> Timer Event Edit >>>	
Text: Travel Path	
Start Time: 07:00 AM	
Repeat Interval: 00:30	
Snooze Time: 00:02	
Message Priority: 02

Save	Next Line

1. Disconnect the existing cable from the "Programming" port on the rear of the Manager's Assistant.
2. Connect the BOH Adapter PN 801114 to one end of the ICC 96" data cable PN 681-6x6-96 and the other end of the cable to the "Programming" port on the back of the Manager's Assistant. Connect the BOH Adapter to the Laptop serial port or USB-Serial converter (purchased separately).
3. Copy the **MATimer.exe** file to the C:\ drive of the Laptop and run the program. Match the Laptop Comm Port for the 801114 adapter with the Comm Port setting in the application. On the initial opening there is default data programmed. Input the correct times, and actions, then press "Send Timers" button. **NOTE: Timers can only be sent TO the Manager's Assistant, the software is not able to retrieve information from the unit.**
4. Once the data has been sent you must save the information by going to File, Save As and naming the file. Once the file is saved you may reopen and edit, or send again at a later date. **NOTE: If the scheduled timer files are not saved before closing, the data will have to be reentered the next time you want to program the timers.**
5. Disconnect the Laptop programming cable from the back of the Manager's Assistant and reconnect the cable coming from the Kitchen Minder and test for normal operation.
